Additive B6M (Corrosion Inhibitor)

Multi-purpose soluble corrosion inhibitor based on monoethanolamine borate ester for use with metalworking fluid preparations. Additive B6M contains lubricity enhancer

## Features

---

- Imparts low foaming characteristics to metalworking fluid blends
- Adds bioresistance to metalworking fluid formulations
- Enhances corrosion protection.
- Compatible with other types of corrosion inhibitors
- Easy to work with & enhances flexibility in formulating

## Sales Specification

---

Parameter	Specification
Appearance	Clear fluid
Total Alkalinity (%NaOH)	21-25
pH (5% dilution in DI water)	9.2-9.8
Specific Gravity @ 20c	1.25-1.35

**Tricool International (Taiwan) Limited.**  
200, Lane 333, San-Min South Rd., Shen-Kang District, Taichung City, Taiwan

# TRICOOL

– International –

Additive B6M

## Applications

---

- Synthetic water-miscible cutting fluids
- Conventional water-miscible cutting fluids
- Semi-synthetic water-miscible cutting fluids

## Blending Advice

---

Tricoool Additive B6M is free from nitrites, phenols, chlorine and PTBBA in accordance with international health and safety trends.
